Codefathers

Team Presentation

Introduction to Software engineering for Engineers
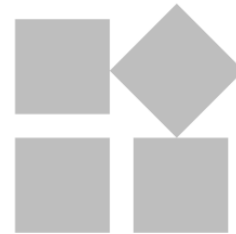

Team

Requirments

System Design

Implementation
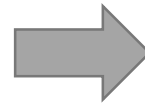

Testing

Product

The team

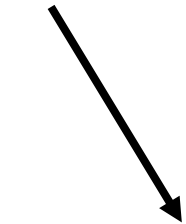

1 0 1 0 1
Code

Control over organization and people

Control over code, process application

Meet the members

ILIAS MERENTITIS
Greece
Erasmus

**EJAS** Nazeertutheen
India
Master

ALABA Ojo
Nigeria
Master

**DIMITRIS** TZILIVAKIS
Greece
Erasmus

ANDROID

JAVA & PROGRAMMING

GITHUB

DESIGN

- Design
- Web Development

- Learn to work as a team member
- Communication skills
- Get into java and android
- Matching subject at home university

DIMITRIS

- Databases
- Android Development
- Software Development

- Familiarization with GitHub working tool
- Improve Java and Android skills
- Matching subject at home university

ILIAS

- Java Programming
- Project Management
- Software Development

- Agile method of project management
- Learning Android Development
- Better team player

ALABA

- Data Mining
- Business Intelligence
- Prior experience in Requirement gathering, analysis and feasibility studies

- Gain experience in project management
- Learning mobile android development
- Improve my Java skills
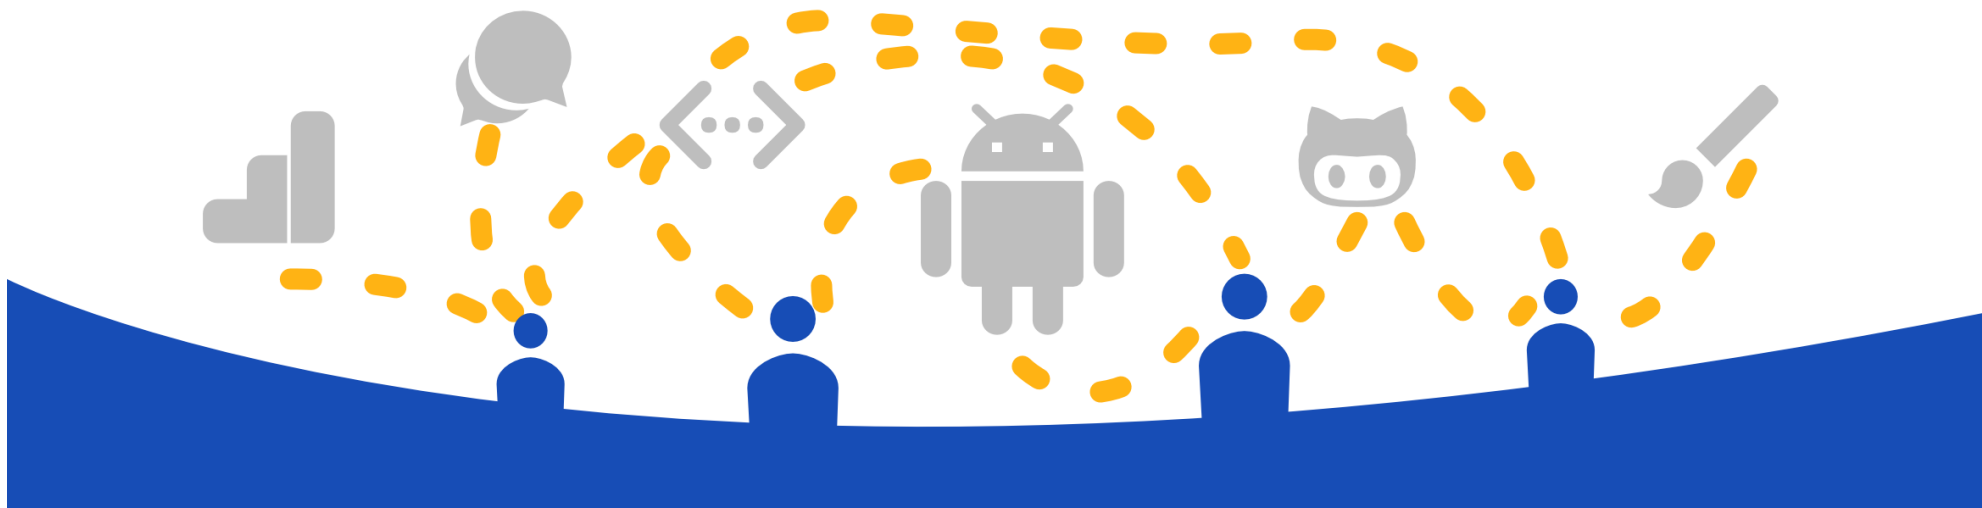

Flexible Roles

No strict Roles	→	Flexibility
No roles at all	→	Chaos

- Be able to switch roles
- Adapt to circumstances

Communication

- Frequent meet ups
- Direct group calls
- Github
- Agile principles: Scrum
- Beers!

The end
